VISION

Ethio-Istanbul General Hospital aims to provide an international standard healthcare that is affordable and accessible, with a respectful and compassionate patient centered approach.

MISSION

Our mission is to minimize medical tourism and provide our clients with all possible option of treatments without leaving the country.

To make a meaningful impact in the lives of individuals and the community, by undertaking the responsibility to perform free life changing Cardiac surgery for up to 300 under privileged children per year.

To perform ground breaking neurosurgical procedures and also establish Ethiopia's first neuroscience research institute.

To expand our vision in to a bigger platform and establish multiple specialty centers and tertiary hospitals in the near future.

Ethio-Istanbul General Hospital, a state-of-the-art medical facility located in the Heart of the City of Addis Ababa, in front of Bole International Airport. We are committed to providing exceptional medical care to patients from all around the world, with a focus on compassionate patient care, innovative treatments, and expert medical staff.

Our hospital is equipped with the latest medical technology and facilities, including advanced surgical suites, diagnostic imaging equipment, and a modern laboratory. We offer a wide range of medical services, from routine check-ups to complex surgeries and treatments. with our main focus being on Adult and Pediatric Cardiac surgery and Neurosurgery in Epilepsy and Parkinson's disease.

We are committed to staying up-to-date with the latest advancements in the medical field, to provide our patients with the best possible medical care.

ABOUT US

OUR CEO

The founder of Ethio-Istanbul General Hospital, Ato Berhan Tedela is a model and respected entrepreneur, who had an unfortunate experience with in health care system in the country. His personal experience ignited his desire to improve the healthcare landscape, leading him to establish Ethio-Istanbul General Hospital in October 2022.

Ato Berhan is a visionary leader, driven by a strong sense of social responsibility and a commitment to making a meaningful impact in the lives of individuals and communities. His unwavering dedication to patient-centric care is the cornerstone of Ethio-Istanbul General Hospital.

As the CEO of Ethio-Istanbul General Hospital, he remains committed to expanding access to quality healthcare across the nation. He envisions the hospital as a beacon of hope and healing, offering a comprehensive range of services, including specialized clinics, state-of-the-art diagnostics, research and rehabilitation facilities.

WHY CHOOSE US?

Ethio-Istanbul General Hospital is a soon to be well-known healthcare institution in Ethiopia, with its advanced technology and experienced healthcare professionals, our hospital excels in the provision of specialized cardiac and neurosurgery services that are not readily available at other hospitals in Ethiopia.

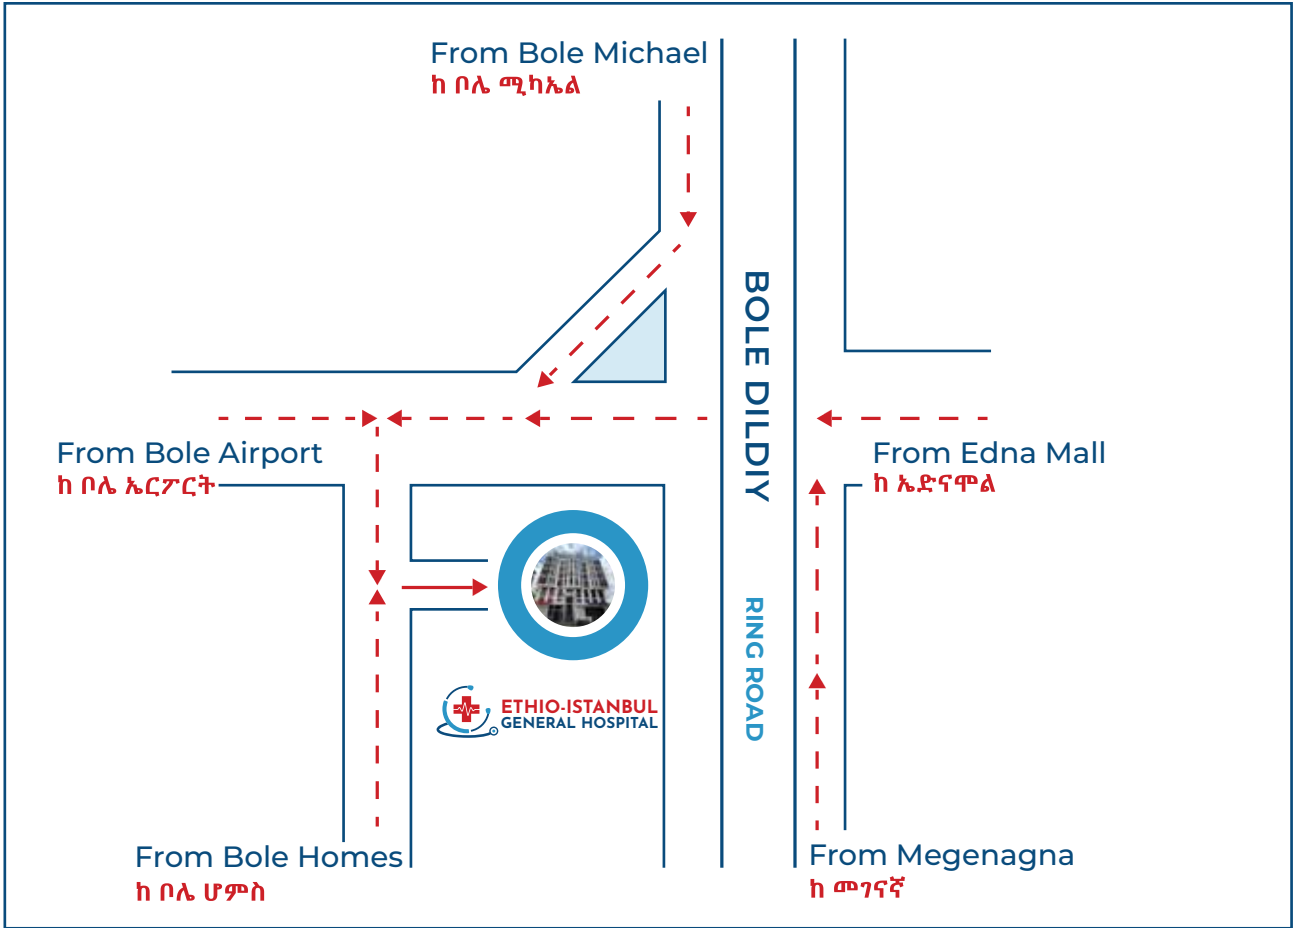

The hospital's interventional cardiology unit is equipped with the latest technology to perform a range of cardiac procedures, including angioplasty, stenting, and balloon valvuloplasty. These procedures are minimally invasive and help patients recover faster with fewer complications. The hospital's CATH LAB plays a critical role in the provision of these services, providing a sterile room where doctors can diagnose and treat patients in a safe and controlled environment.

Ethio-Istanbul General Hospital's open-heart surgery department is also equipped with its very own cardiopulmonary bypass machine which allows for the performance of life-saving procedures like Coronary Artery Bypass Graft (CABG) and heart valve repairs and replacements.

Our hospital has also established a neurosurgery department which will be first in Ethiopia to use neurosurgery for the treatment of Epilepsy which is refractory to medication, Neuro modulatory intervention for Parkinson's disease and dystonia with video EEG and PET MRI.

Another unique feature that sets Ethio-Istanbul General hospital apart from other healthcare providers in Ethiopia is the hospital's medical oxygen plant. The plant produces high-quality medical oxygen that is used in surgical procedures and other medical conditions ensuring that patients receive the oxygen they need to make a full recovery.
